

OM-arius

Text & music: Dănu Extrem © SUISA

Now I fly with a UFO throu the galaxy
where does it go i don't know for shure
I hardly understand their strange language
their language is the word of God and it's called Love

I'm flying on and on across the universe
the blue star is getting tiny and small
untill it is just a bright spot in the dark
I jell: by by Mama, sorry i got to go

I don't know where it goes
enlightement will be tomorrow
but now we are here
on planet Om-Arius...

Now we're getting closer to this big star
larger and larger grows his warming light
I think of Nina wonder if she's here
the endless mist surrounds me and keeps my heart

I fall deep into this fog
everything turns into eternal light
into Love and harmony deep within myself
I melt with God and Buddah
with Allah and with You

I don't know where it goes
enlightement will be tomorrow
but now we are here
on planet Om-Arius...
